

Let's go to the Ocean!

1. Gather your materials. You will need a large shallow plastic container, some sea animals, some decorative pebbles, a few towels for your floor, a pitcher and some water.

2. Start by laying out our towels and putting your container on top.

3. Put some water in your pitcher and pour it in.

4. Add some pebbles, you can use sand too but if you want easy clean up stick to glass pebbles or small stones.

5. Add your animals. You can even design and make your own animals using materials that you have at home.

6. Let the fun happen! Have some scoops on hand if you just want to scoop and pour the water.
